

## **Engineering Service**

We have a workshop facility for Welding jobs through GMAW, GAS, TIG, MIG, and Metal Spray Processes under our supervision.

We also guide our clients regarding the best utilizations of the material and equipment provided.

We manufacture the laboratory equipment for testing the recovery and cane fiber for the Sugar industry.

CHOPPER CUM FIBERIZER + COMPRESSOR + HYDRAULIC PRESS

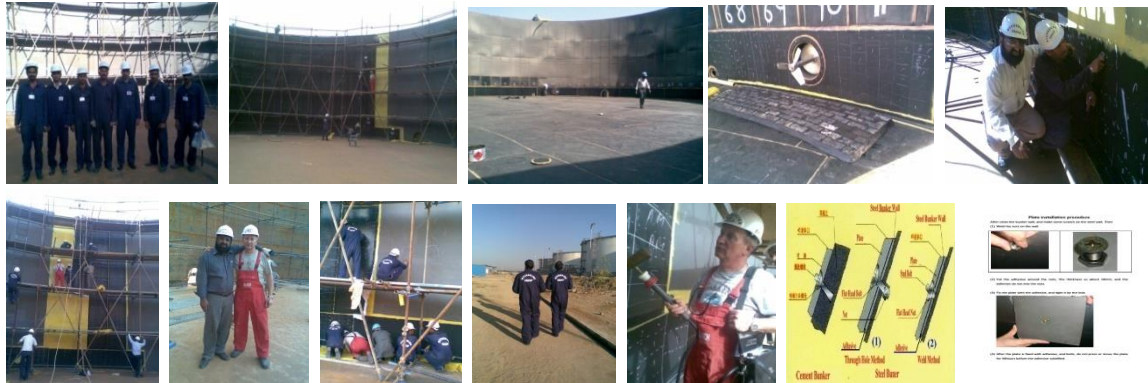

We focus on repairing of turbines parts, e.g. re-babbitting of journal bearings, new bearing liners, thrust pads, labyrinth seals, nozzles, rotor blades, combustion liner, diaphragm blades, and mechanical pump and expansion joints. Grinding of shafts & repairing of engine blocks and heads etc.

We can facilitate our clients with local and foreign professional experts as per the job requirement. We also provide skilled manpower for site jobs.

We have been offering above services for more than two decades. Our vast experience of equipment utilization in the industry with association of our foreign partners is our prominent trait in the business.
